Features

Ideal For
Passageways, corridors, access routes, stairs & exterior decks.

Weather
Resistant to UV, salt water & temperature exposure.

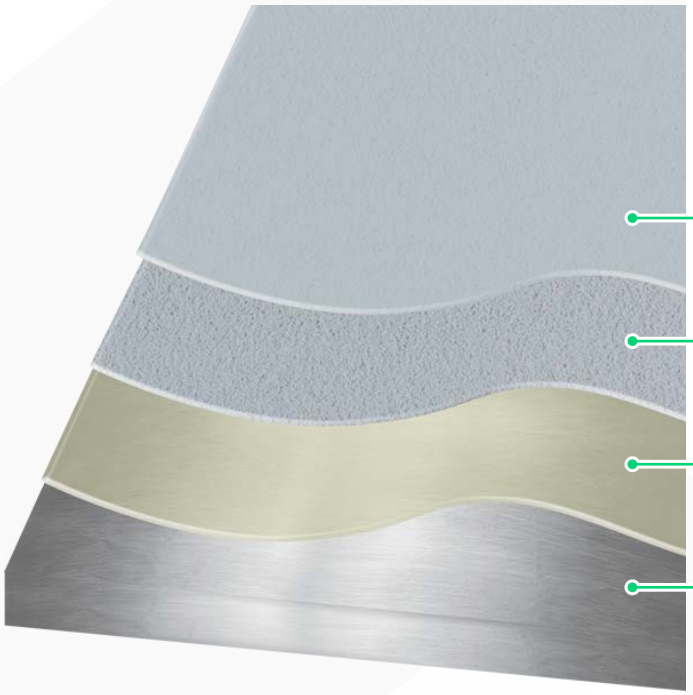

Slip Resistant
R11 slip resistance typical for wet & dry conditions.

Easy Clean
Seamless finish helps prevent dirt ingress.

Durable
High wear & impact resistance for long lasting performance.

Certified
MER / MED certified system documentation available.

System Build-up

4 **PU Topcoat**
Pigmented, Durable Topcoat

3 **PU Flex Coating**
Pigmented Base Coat, with Quartz Sand

2 **Epoxy Primer**
With Quartz Sand

1 **Substrate**
Prepared Deck

Technical Information & Performance

Property	Value / Performance
System Thickness	2.0-3.0 mm
Slip Resistance	R10, R11 (Typical)
Chemical Resistance	Good to Excellent
Water Resistance	Early Water Resistance
Cure Time @ 20°C	Light Foot Traffic: 12 hrs; Full Cure: 5 days
Colours Available	See Colour Chart (Upon Request)
Abrasion Resistance	High
Impact Resistance	Class I
Fire Performance	Tested & certified according to IMO 2010 FTP Code part 5 & 2 - Primary deck coverings & floor covering
UV Resistance	Yes

Key Benefits & Features

- Excellent Slip Resistance
- High Wear & Impact Resistance
- Comfortable Underfoot
- Flexible & Crack Bridging
- Weather Resistant
- UV Stable Surface
- Interior or Exterior Use
- MER / MED Certified System Documentation Available
- Solvent Free System
- Flexible Surface

Ideal Applications

- Passageways & Corridors
- Access Routes & Walkways
- Stairs & Landings
- Exterior Decks
- Crew Areas
- Public Areas
